

BUTTE COUNTY RICE GROWERS ASSOCIATION
SOAKING WAIVER FOR CLOROX TREATMENT

Background:

Butte County Rice Growers Association (Bucra) is offering a soaking treatment for Bakanae using Ultra Clorox 6.15% Bleach. The labeled rate for treatment is 5 gallons of bleach for every 100 gallons. Because of the large amount of bleach required, and the safety concerns regarding employees and disposal, Bucra has decided to treat using a rate of approximately 1.20 gallons of bleach for every 100 gallons. Because we are treating with less than the labeled rate, Bucra is requiring all growers who will be treating to sign this waiver.

WAIVER

Grower acknowledges that Bucra is using less than the labeled rate to treat for Bakanae using Clorox. Grower hereby agrees to defend, indemnify and hold Bucra harmless from any and all loss or damage arising out of the use of this treatment including but not limited to, its effectiveness of use, or lack thereof. No warranties, expressed or implied, are made on the merchantability of the product.

By signing below, grower acknowledges he/she has read the above and understands the waiver. This waiver will remain in effect unless revoked by the Grower or a change in Bucra's soaking procedures occurs.
